INTRODUCTION

Pop-Art - Math: Christmas

With these motivating math coloring worksheets you can playfully practice basic math again and again until you end up with a picture that you can put on your wall or give as a gift. You can also cut out the colored-in pictures and stick them alongside others to make a big class wall frieze.

Math coloring worksheets consist of many areas, each containing different math sums. The result of each sum corresponds to a color, with which you color in that area. As you go along the picture slowly becomes more colorful.

This material contains 16 worksheets with four Christmas-themed pop-art motifs, each of which are covered by the four basic math topics: Addition, subtraction, multiplication, and division. The 16 coloring-in worksheets are organized like this:

Four math coloring worksheets: Addition, numbers 1-20

Four math coloring worksheets: Subtraction, numbers 1-25

Four math coloring worksheets: Multiplication, numbers to 100

Four math coloring worksheets: Division, numbers to 100

In addition, there's a pre-colored in version of each worksheet, against which you can check your own results and see if the colors match. These tasks are intended for deepening and repeating your grasp of math basics!
