HOW TO MAKE IT

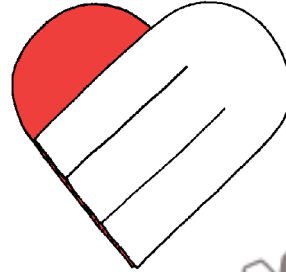

Woven Hearts

1

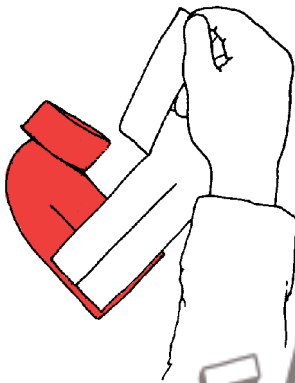

Choose the woven heart template you like and print two copies of it, each on different colored paper. Fold along the dotted line, cut out the shapes and cut along the black lines. Fold it the other way so that the printed side is on the inside.

2

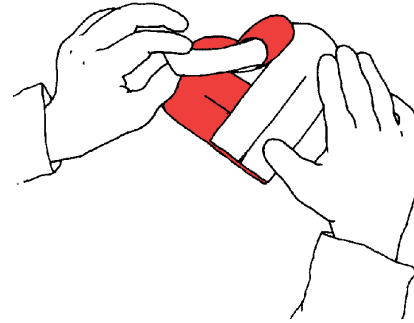

Place the lighter colored half on top of the darker half to make a heart shape.

3

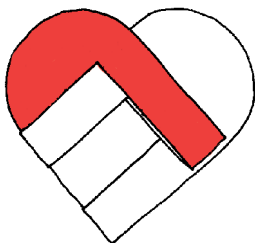

Bend the upper strip of the lighter half upwards. Pull out the upper strip of the darker half and bend it upwards as well. If the heart has shifted in the process, simply push it back into place.

4

Open the darker strip so that it forms a loop and pull the lighter strip through the loop.

5

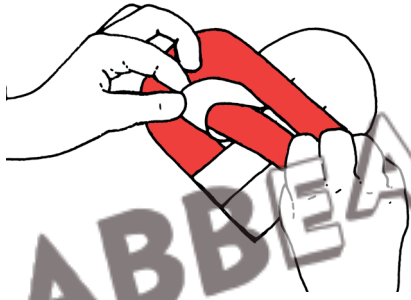

Now the heart should look like this. So you don't lose track of where you are, be sure to realign the two halves after each step.

6

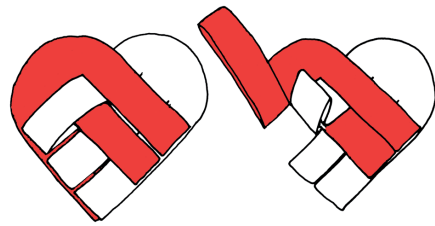

Bend the next lighter strip upwards and do the same for the next darker strip.

7

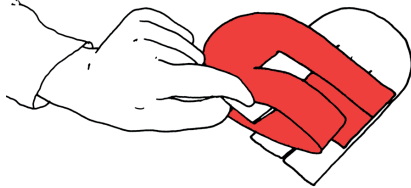

This time, open the lighter strip so that it makes a loop and pull the darker strip through the loop.

8

Now the heart looks like this. Bend the next lighter strip upwards and pull out the next darker strip and bend it upwards as well.

9

Open the darker strip to form a loop and pull the lighter strip through it.

10

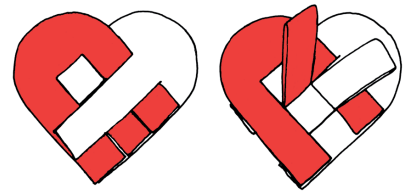

Be sure to realign the two halves to keep the heart shape. Then bend the first darker strip upwards. Pull out the second lighter strip and bend it upwards as well.

11

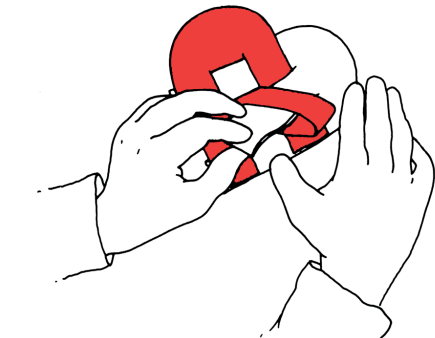

Open the lighter strip to form a loop and pull that first darker strip through it.

12

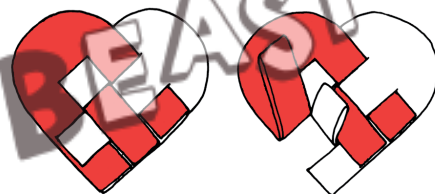

When you realign the parts to the heart shape, you can now see how the second lighter strip is on top. Now bend the next light and dark strips upwards.

13

Open the darker strip to form a loop and pull the lighter strip through.

14

Now fold the final pieces of the light and dark strips upwards.
