HOW TO DO IT

3D Stars

1

Print out the templates and color in the stars. The flaps for glueing the stars together remain white. For one 3D star you'll need two star templates.

2

Cut out the star templates along the gray outer line.

3

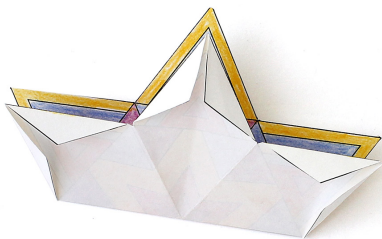

Score and fold back the glueing flaps with a scoring tool or nail file along the black outer lines.

4

Fold the star together along the three long diagonals from tip to tip so that the colored-in side faces outwards, and then unfold again.

5

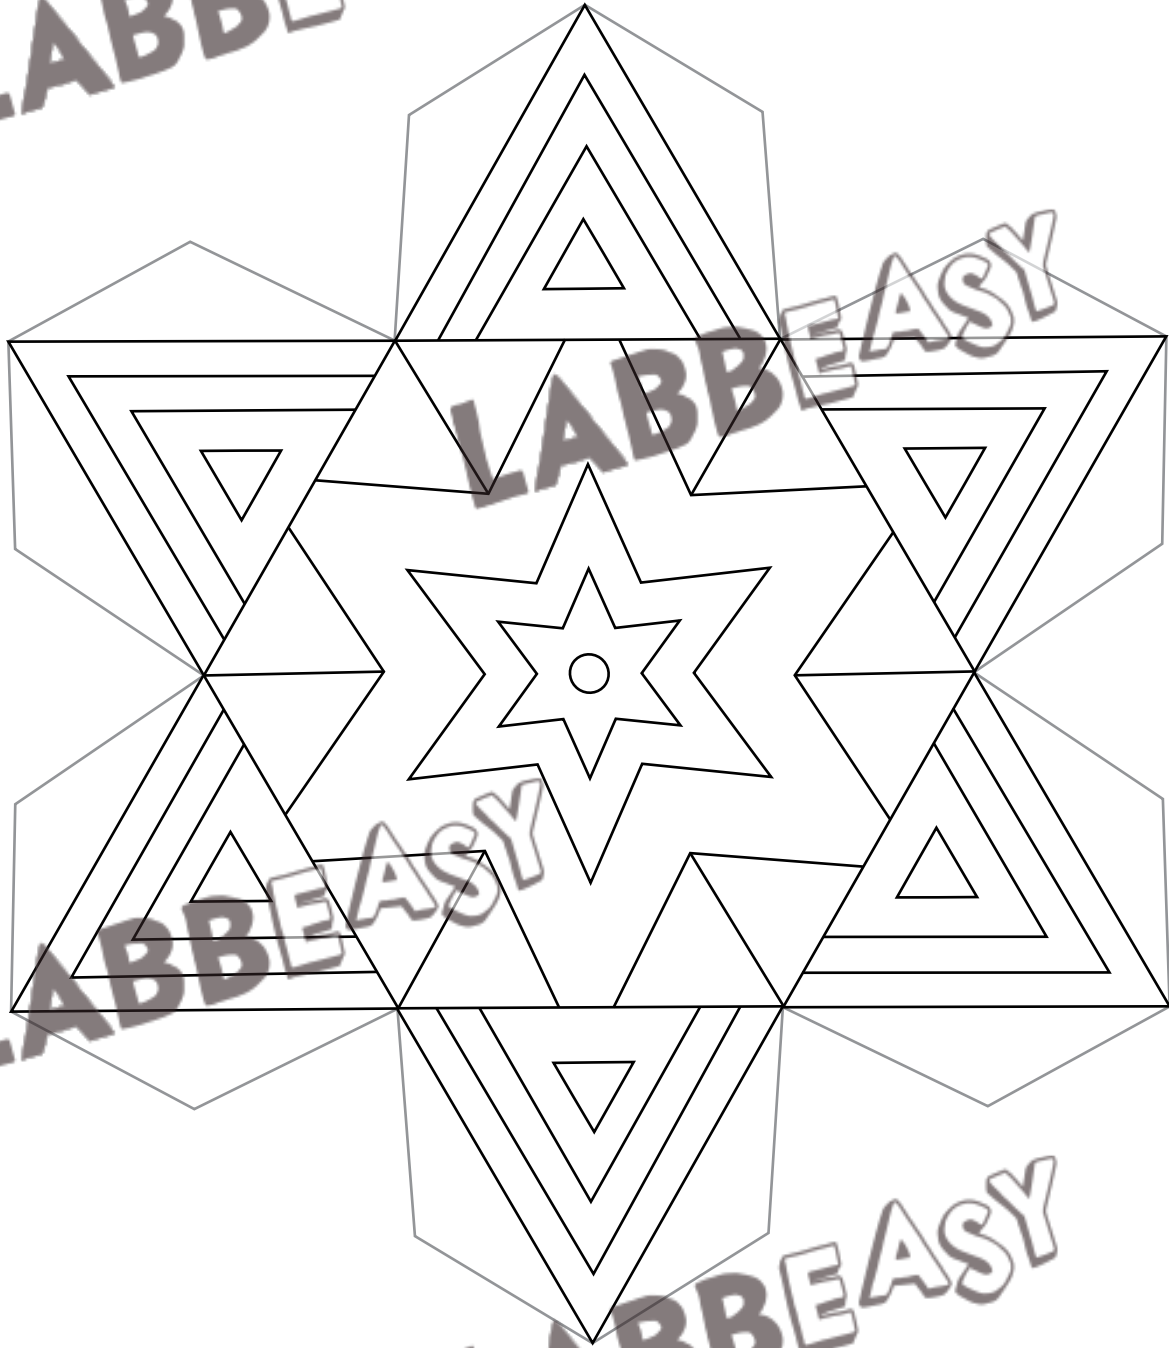

Fold the star together along the three short diagonals so that the colored-in side faces inwards, and then unfold again.

6

Turn the star over and fold it into shape. Put glue on the glueing flaps and stick the two stars together back-to-back.
