## INTRODUCTION

# Tangram

Tangram is an old Chinese puzzle game which consists of seven pieces that are geometric in shape: Two large triangles, a medium-sized triangle, two small triangles, a square and a parallelogram. You can use these pieces to make an endless variety of animals, buildings, boats, and figures.

With Tangram, kids can playfully get to grips with geometric forms and start to understand the relationship between shape and surface. In addition, the game also encourages creativity and imaginative spatial awareness.

## TANGRAM PUZZLE PIECES

Cut the Tangram pieces out, following the lines. If you like, you can pre-stick the pieces onto stiff card. To do that, cut out the whole square first, put glue on the back of it and stick it onto the card. Lastly, cut out the individual pieces.
