HOW TO MAKE IT

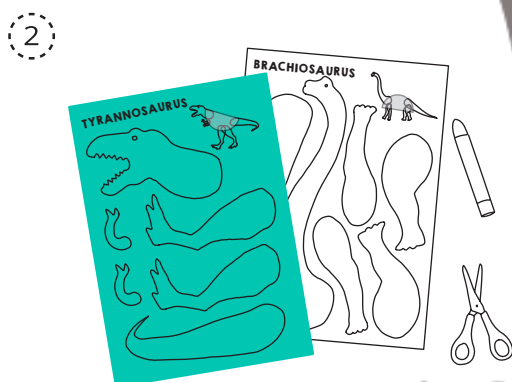

Paper Plate Dinosaurs

Since no one really knows what colors or physical make-up the dinosaurs had, it's up to anyone what their dinosaur should look like.

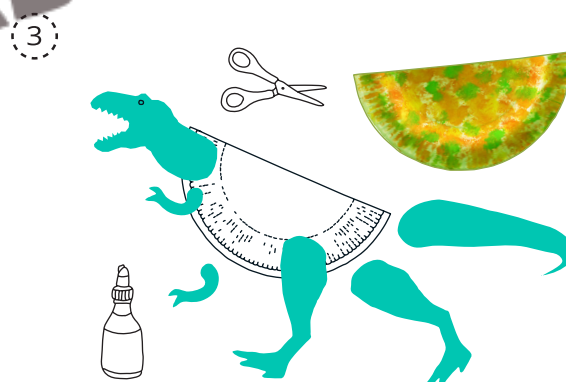

You can use acrylic or finger paint to decorate your paper plates using techniques such as finger painting, sponge painting or painting with corks. You can also color them using crayons, colored pencils or markers / felt-tip pens.

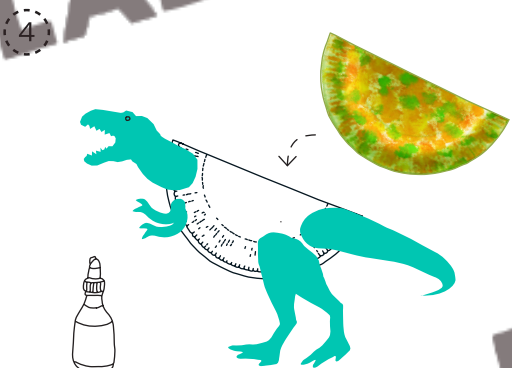

Place the paper plate with the bottom side up and paint or color it with bold colors. Don't worry if the plate dents in while painting; it can easily be bent back into shape.

Print the dino template on colored or white heavy printing paper and neatly cut out the pieces. If you like, paint or color the front and back of the dino parts.

Fold the plate in half and cut it down the middle. Apply glue to where you want to place your dino pieces on the undecorated side of one half and press the pieces firmly in place.

Apply glue to the entire edge of the plate - wait a little bit - and then press the second half exactly on top of the first, like a sandwich.

Press the two halves firmly together and let it dry. Depending on the type of dinosaur, the round side of the plate can point up or down.
