INTRODUCTION

Dinosaur-ABC

A for Ankylosaurus... B for Brachiosaurus... C for Coelophysis... Even four-year-olds remember six-syllable dinosaur names and enthusiastically collect facts about them: The velociraptor was a carnivore and was 1.5 to two meters long. It lived in the Cretaceous period, which was about 85 to 76 million years ago.

There are children who know an amazing amount about dinosaur before they can even read. What makes children dinosaur experts? Perhaps it's because dinosaurs are extinct and aren't part of a kid's normal world of experience. Unlike the characters from fairy tales and legends, dinosaurs actually existed. Or is it because the big dinosaurs seem to be strong and invincible - characteristics that every child would like to have?

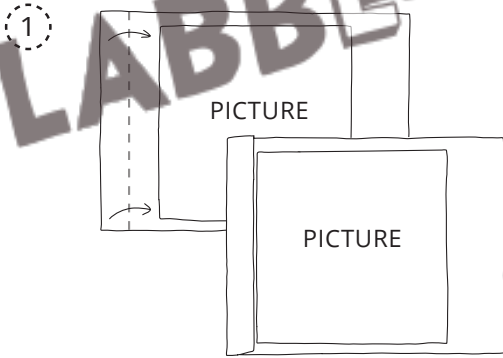

In any case, this specialized knowledge requires a high level of attention and a greater capacity to process information, which is what we want to encourage!

The dinosaurs in this ABC can be colored in individually or assembled together in a 'My first book'. In addition, there's also a blank title page with which the children can put together their own book from the various titles from the 'My first book' series... AWESOME!

HOW TO DO IT

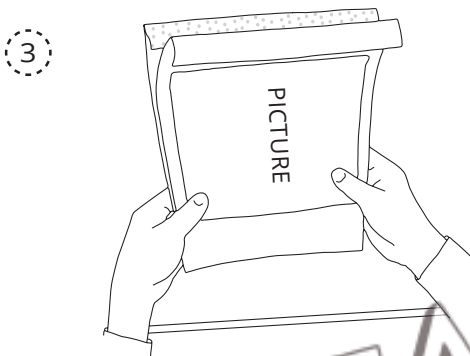

My First Book

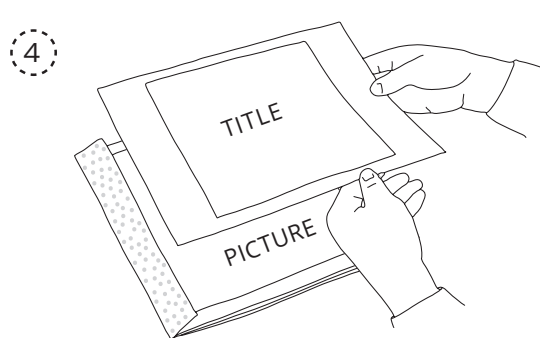

Prepare all the pictures: Fold every left-hand edge over to meet the edge of the picture exactly. Score the folds with your fingernail.

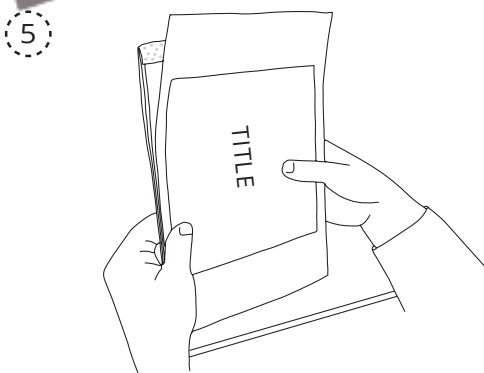

First put glue on the fold of the last picture, using a piece of paper to protect the picture if needed. Lay the next page on top.

Stand the stacked pages on their vertical edge on the table to align the edges. Holding tightly to the right side, lay them down again and press the left-hand folds firmly together.

Glue all the picture pages together in this way. Put glue on the fold of the last picture and lay the title page on top.

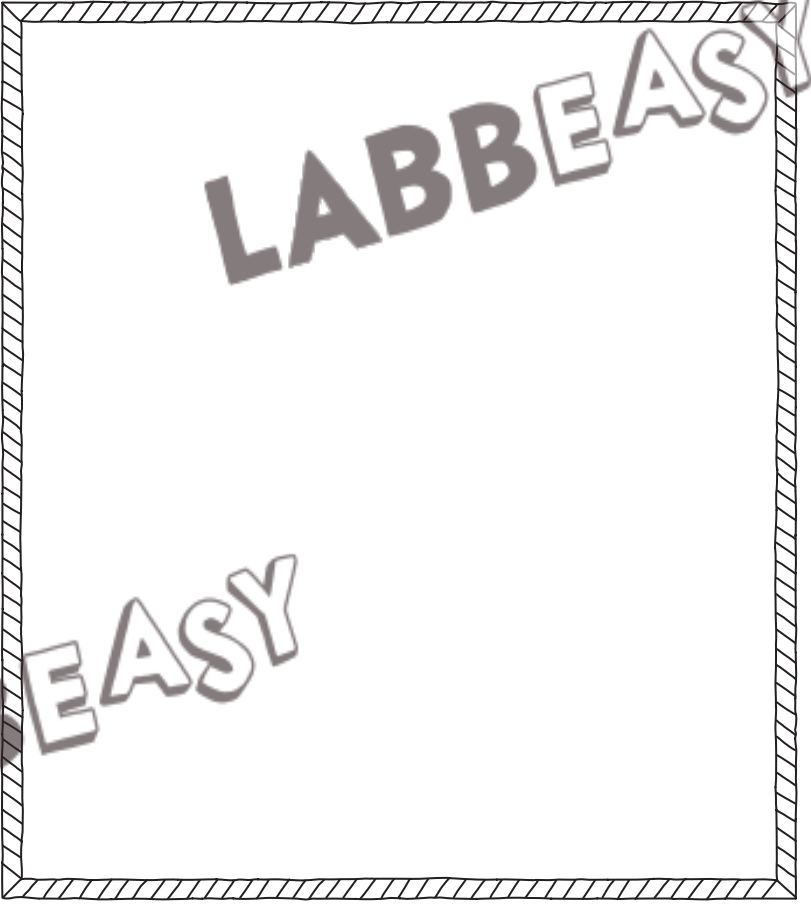

Repeat step three and press the title page firmly to the glued fold. The left-hand edge of the title page will stand proud of the folded edge. Leave to dry briefly!

Fold and carefully glue the proud edge of the title page onto the rear side of your book. Score the edge. You can assemble your book either before or after coloring it in.
