HOW TO MAKE IT

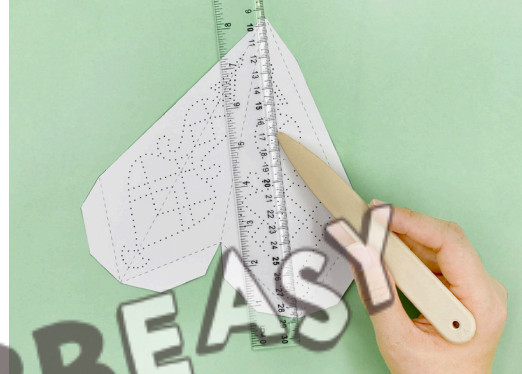

Pin-Prick Stars

1

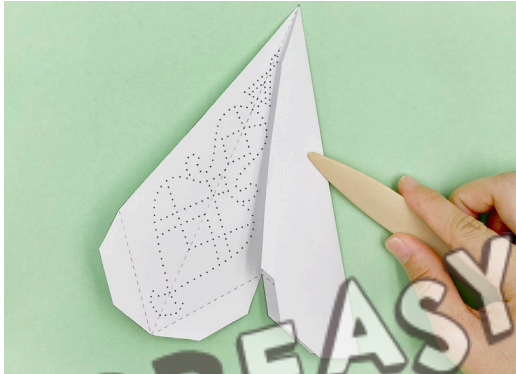

Print 5 copies of the template with your chosen pin-prick design on white heavy printing paper and neatly cut each one out.

2

Using a ruler to help, score the dotted lines.

3

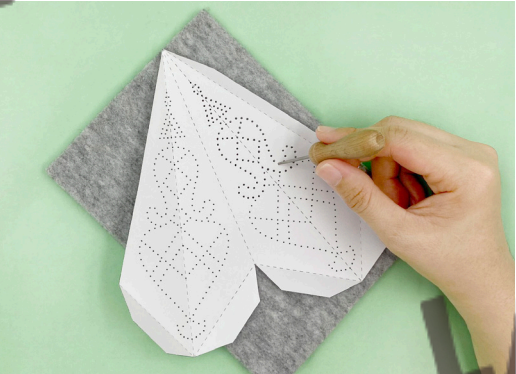

Fold the surfaces so that the dotted lines are facing inwards.

4

Fold the star tip once as shown in the picture and open it again.

5

Place the templates on a prickle felt and prickle all the prickle points. Once all the templates have been prickled, it's time to assemble them.

6

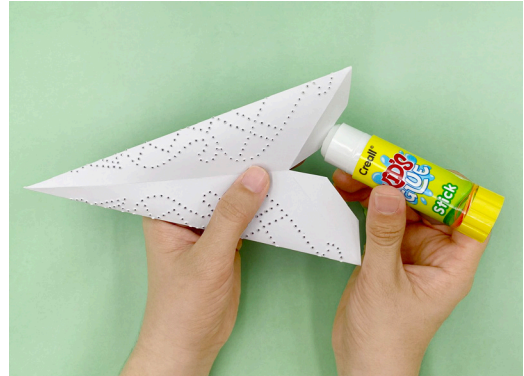

Coat the adhesive flap on the side with a little glue ...

7

... and glue the first star tip together as shown in the picture, so that the gluing point is in the centre. repeat steps 6 + 7 to glue the remaining tips together.

8

When all five star tips are finished, coat the centre gluing surfaces of the first tip with glue...

9

... and glue them onto the second star tip.

10

Hold them together for a few minutes until the glue has dried and check that the connection holds well.

11

Now glue the third star tip to the star...

12

... and wait again until the glue is dry and holds well.

13

Repeat steps 11 + 12 until all five tips are glued together.

14

Carefully unfold the star. Apply gentle pressure to the centre point to make it easier to unfold the star.

15

Bend the gluing surfaces slightly outwards and coat the last gluing surfaces with adhesive...

16

... and carefully press the two tips together so that the adhesive surfaces are touching.

17

Hold the star together for a few minutes until the glue has dried and check that the connection holds well.

18

Wow...
